The train@mine-project:

The project is carried out by a German consortium consisting of Mitteldeutsche Braunkohlengesellschaft mbH (MIBRAG), RAG Mining Solutions GmbH, Emscher Wassertechnik GmbH and the University of Leipzig. The industrial partners are leading German companies in mining and environmental issues. We possess long standing experience in the specialist fields of open-pit and underground coal mining, water and environmental management. Moreover we boast highest standards in production, environmental protection, occupational safety and resource management. In addition, the University of Leipzig provides scientific expertise in the field of services management and supports the industrial partners with management related topics and the conceptional design for the project.

The train@mine-portfolio:

Vocational training and technical consulting

- Mine Management
- Environmental Management
- Water Management
